Appendix I: Declaration on Use of GAI (Generative Artificial Intelligence) Assistance in relation to Assignment/Project (to be submitted individually even for group projects)

I Muhamad Rifqi bin Zulkiflie (student name), muhamadr004@e.ntu.edu.sg (NTU email) honestly and sincerely make the following declaration in relation to the following course submission:

1. Name of course: Object-Oriented Design & Programming
2. Course Code: CT2003
3. Instructor: Dr Li Fang
4. Title of Assignment/Project Submission: Restaurant Rush (Group 3, COMP1)

In relation to the foregoing I hereby declare that, fully and properly in accordance with the Assignment/Project Instructions I have (check where appropriate):

i. Used GAI as permitted to assist in generating key ideas only. ☑

ii. Used GAI as permitted to assist in generating a first text only. ☑

And/or

iii. Used GAI to refine syntax and grammar for correct language submission only. ☑

Or

iv. As it is not permitted: Not used GAI assistance in any way in the development or generation of this assignment or project. ☐

I also declare that I have :

a. Fully and honestly submitted the digital paper trail required under the assignment/project instructions; and that

b. Wherever GAI assistance has been employed in the submission in word or paraphrase or inclusion of a significant idea or fact suggested by the GAI assistant, I have acknowledged this by a footnote; and that,

c. Apart from the foregoing notices, the submission is wholly my own work.

Muhamad Rifqi bin Zulkiflie — 13 November 2026

(Optional) Sample Reflection Questions:

In 150 words or less, briefly state up to 5 key ideas that you formulated that the GAI tools alone could not have generated.

1. Working out what a customer needs to remember. I listed the id, the state, the table and the food myself before turning them into fields in the Customer class.

2. Realising that every customer, not only the first one, starts at satisfaction 100 and WAITING, because the constructor runs once for each arrival.

3. Deciding to type the Stage 1 customer code myself so I would understand it, and only using generated code later after our instructor approved AI use.

4. Asking why prices are kept in cents and not dollars, then checking the reason against the assignment brief.

Identify the key facts generated by the GAI tools and briefly describe how you have verified them.

- Java rules, e.g. an abstract method has no body, the package line must match the folder, and a field should not be declared again inside the constructor. I checked these with the errors from VS Code and javac when I got them wrong.
- That my classes work. After each change I compiled the whole project and ran the stage 1 victory replay, which still ended in Victory. CustomerCheck, VIPCriticCheck and SatisfactionRecoveryCheck all printed "All checks passed."
- The VIP 10% discount, money in cents and the satisfaction losses (8, 5, 12). I checked these against the assignment brief.
